PROFESSIONAL SUMMARY

Dedicated IT Team Lead and software developer with a strong foundation in full stack web development, Python, and machine learning. Experienced in IT operations, infrastructure management, and building data driven applications. Recently completed the FreeCodeCamp Python certification and earned an Oracle Cloud Infrastructure Generative AI Professional certification. Eager to transition into Python development or ML adjacent roles where technical, leadership, and AI skills can drive innovation.

PROFESSIONAL EXPERIENCE

IT Team Lead

Amplifier Logistics Company, Austin, TX | January 2021 – Present

- Led IT operations and technology implementations to streamline business processes and enhance efficiency.
- Built a full stack internal web application supporting the client service team using HTML, CSS, JavaScript, and a custom PHP/SQL backend.
- Collaborated with cross-functional teams to integrate technology initiatives and align IT strategies with organizational goals.
- Mentored junior staff, fostering continuous learning while managing vendor relationships and contract negotiations.
- Oversaw IT infrastructure reliability and security, including user profile management for all employees and temporary staff.
- Delivered technical support for hardware and software issues including RF guns, WiFi connectivity, and network configuration.

EDUCATION & CERTIFICATIONS

- FreeCodeCamp Python Certification | 2026
- Oracle Cloud Infrastructure — Generative AI Certified Professional | 2025
- Oracle Cloud Infrastructure — Data Platform Foundations Certified | 2025
- Full Stack Web Development Bootcamp | 2022

KEY PROJECTS

Python Movie Recommender | github.com/MarcoMoya1/python-movie-recommender

- Built a content based movie recommender system using Python, Pandas, and Scikit-learn.
- Applied cosine similarity algorithm across 9,700+ movies and 100,000+ ratings from the MovieLens dataset.
- Implemented a text interface allowing users to search by movie name and receive 5 personalized recommendations.

Gym Progress Tracker | github.com/MarcoMoya1/gym-progress-tracker

- Developed a command-line workout tracking app with a structured menu system using Python and Pandas.
- Features include workout logging, history filtering by exercise, personal bests tracking, and progress analysis.
- Implemented CSV data persistence to store and retrieve workout data across sessions.

Internal Client Data Tool | Private Company Tool

- Developed a full-stack web application supporting the client service team with real time data retrieval.
- Built custom PHP API backend executing hand written SQL queries against company database.

Twitter Bot for Crypto Scam Detection | github.com/MarcoMoya1

- Built an automated bot using Puppeteer to detect, filter, and report scam-related tweets.
- Incorporated automated alerts and reporting features to enhance user safety.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3, SQL, PHP

Frameworks & Libraries: React, Node.js, Express.js, Pandas, NumPy, Scikit-learn, Tailwind CSS, Puppeteer

Tools & Platforms: Git, GitHub, VS Code, AWS, Azure DevOps, Navicat, Notion

Machine Learning: KNN Classification, Cosine Similarity, Data Cleaning, Feature Engineering

Other: IT Infrastructure Management, Team Leadership, Project Management, Hardware Troubleshooting
